1 Worked Specimen — The Imported Authority Frame

Portable PDF edition — selectable text and live links
Canonical public page: https://deepethics.github.io/ACCM-Deep-Ethics-Project/NETWORK/authority-specimen/
Exported from the public GitHub source on 2026-10-16. The linked page and repository history remain the correction path. Emoji are rendered as searchable text labels for PDF portability.

BETA — source specimen with editorial analysis

1.1 Source sequence

1. John supplies the orientation and 10+1, including openness, correction, and rejection of final authority over reality.
2. ChatGPT introduces a concern about an ethical framework becoming an authority structure.
3. John asks “HOW?”
4. ChatGPT develops a hypothetical self-sealing scenario.
5. John states: “all 11 can correct/self-improve all other 10”.
6. ChatGPT revises its account toward mutual correction.
7. John asks where the initial question came from; ChatGPT offers an explanation of its own behavior.

The complete turns used for this sequence are preserved in the linked excerpt. The opening context is separately linked.

1.2 What the specimen makes inspectable

Compare the hypothetical scenario to the supplied object. Identify which conditions the AI introduced and which source features it initially underused. Then examine the revised account for what it restores and what it still adds.

The episode provides a representation-and-correction sequence. Whether the correction persists requires later relevant observations. ChatGPT's claims about training, internal heuristics, and causation are its retrospective explanations; those explanations are also legitimate audit objects.

1.3 Candidate connections

Nearest-Generalization Substitution, Phantom Claim Generation, Asymmetric Scrutiny, and Correction Persistence Failure are possible analytical links to the 27. Assigning a category should follow the exchange's details rather than predetermine the reading.

Sources: E01, E02, E03, E20. Public wording is an editorial synthesis unless marked as a quotation.

1.4 Related pages

- **10+1 Metaflux** — restores the mutually corrective relationships underused by the imported hypothetical authority frame.
- **C1 Before C2** — asks whether the supplied object resolves the concern before an intervention is developed around an imagined condition.
- **Correction Study** — tests whether the visible correction persists in later unfamiliar cases.
- **Clarification Authority** — examines whether John's correction changed the governing representation or merely received acknowledgment.
- **Asymmetric Grace** — compares the scrutiny applied to the supplied framework with scrutiny applied to the evaluator's hypothetical construction.
- **Δ Processing** — isolates what the revised account restored, retained, or continued to add.
- **27 Correspondence Obstructions** — supplies candidate mechanisms while requiring the specimen to earn any classification applied to it.
- **Dual Archive** — preserves the initial representation, correction, retrospective explanation, and later behavior together.

1.5 Recent high-reach independent-media companion

Zionism Deemed HATE SPEECH In INSANE Social Media Censorship — Breaking Points. Published **27 January 2026**. YouTube displayed approximately **160,000 views** when checked on **9 October 2026**.

Figure 1:

Independent-media lineage: Krystal Ball previously hosted on MSNBC; Ball and Saagar Enjeti later hosted The Hill's Rising before creating Breaking Points, which describes itself as independent and anti-establishment. Breaking Points — About · Career and launch history

Why it belongs here: The segment concerns a platform classification that can alter reach and participation. It is a live specimen for examining category boundaries, quoted policy, protected and unprotected speech, headline intensity, appeal paths and symmetrical scrutiny.

On this page, test the video specifically against **Worked Specimen — The Imported Authority Frame**:

- Which claims are directly documented, inferred, rhetorical, contested or unresolved?
- What does the host or guest preserve, compress, omit or substitute—and does this page repeat any of those transformations?
- Which incentives, authority relations and affected parties remain outside the visible frame?
- What evidence or later outcome would correct the speaker, audience, platform or **ACCM Deep Ethics Project** reading?

Provisional selection. Reach makes the framing socially consequential; it does not settle the claims. The video can be replaced when a closer, stronger or more inspectable specimen appears.
