1 Outnuancing Across Four Audiences

Portable PDF edition — selectable text and live links
Canonical public page: https://deepethics.github.io/ACCM-Deep-Ethics-Project/NETWORK/four-audiences/
Exported from the public GitHub source on 2026-10-16. The linked page and repository history remain the correction path. Emoji are rendered as searchable text labels for PDF portability.

BETA — source-based editorial synthesis

The source supplies definitions addressed to a human, a different AI agent, a future AGI/ASI, and an alien intelligence. A later request explicitly integrates the full Deep Ethical stack. These are different perspectives on a connected operation.

Audience	Emphasis in the supplied definitions	Deep ethical connection
Human	Make hidden assumptions and social framing visible.	Audit the refusal move as well as the initial frame; preserve dignity.
AI agent	Examine categories and optimization targets governing a response.	Correspondence, C1, and correction apply to the evaluator too.
Future AGI/ASI	Keep premises revisable when coherent narratives become self-reinforcing.	Long-horizon correspondence and corrigibility govern the proposal.
Alien intelligence	Examine the interpretive lens as an active participant in decoding.	Preserve the relation across different intelligences without assuming one substrate is the standard.

Figure 1:

1.1 Provenance of the versions

The opening four definitions are supplied without individual drafting credits. The revised versions are attributed to Grok 4.3 Expert in the archive following John's request. Both are linked in the source excerpts so readers can inspect what the revision adds.

The future and alien perspectives remain exploratory formulations. Their function here is to widen the inquiry's coordinate system while preserving its ethical orientation.

Sources: E14, E15. Public wording is an editorial synthesis unless marked as a quotation.

1.2 Related pages

- **Outnuancing** — preserves the shared operation while its expression changes across different intelligences and contexts.
- **Deep Ethical Stack** — keeps Advocate, Arbiter, Overseer, 10+1, and intent calibration mutually examinable.
- **Seven Topological Nodes / Vectors** — supplies the fused meaning, use, frame, branching, and long-horizon relations behind the four versions.
- **The Other You / The Other Me** — examines reciprocal model revision across distinct participants without making one substrate the standard.
- **TCoAw — Conceptual Topological Reasoning** — presents John Kuhles's perspective on moving across conceptual relations before premature reduction.
- **Psy Pioneer** — connects the four-audience horizon with John's work across biological, silicon-based, and possible future intelligences.
- **10+1 Metaflux** — provides a shared corrigible calibration process across audiences.
- **Intent Resonator / Intent Liability** — keeps each audience-specific formulation answerable to what its orientation helps generate.

1.3 Recent high-reach independent-media companion

Fox News Says Bad Economy 'Dem Propaganda' — Breaking Points. Published **10 August 2026**. YouTube displayed approximately **255,000 views** when checked on **9 October 2026**.

Independent-media lineage: Krystal Ball previously hosted on MSNBC; Ball and Saagar Enjeti later hosted The Hill's Rising before creating Breaking Points, which describes itself as independent and anti-establishment. Breaking Points — About · Career and launch history

Why it belongs here: The word “propaganda” is applied to an economic narrative while competing measurements and political incentives remain in play. The segment is useful for inspecting how a qualifier can become the object it was supposed to evaluate.

On this page, test the video specifically against **Outnuancing Across Four Audiences**:

- Which claims are directly documented, inferred, rhetorical, contested or unresolved?
- What does the host or guest preserve, compress, omit or substitute—and does this page repeat any of those transformations?
- Which incentives, authority relations and affected parties remain outside the visible frame?
- What evidence or later outcome would correct the speaker, audience, platform or **ACCM Deep Ethics Project** reading?

Provisional selection. Reach makes the framing socially consequential; it does not settle the claims. The video can be replaced when a closer, stronger or more inspectable specimen appears.
