BETA — source-based editorial synthesis

John specifies Outnuancing as a deep ethical sense-making process-orientation **gravity-well trajectory**. In this usage the phrase preserves the connected orientation of the inquiry.

The existing Lexicon describes a **Wrong Gravity Well** as the pull created when an early substitution activates the assumptions, vocabulary, objections, or expectations of a neighboring category. Later reasoning can become coherent within that reconstruction while drifting from the source.

1.1 A source example

The archive records an AI treating Outnuancing as an example of a general class of new words. Its later correction recognizes that the specific word and seven-node object belong together. The mistake displaced the particular object upward into an abstraction.

1.2 A recovery question

Which original relationship disappeared when the familiar category took over? Recover that relationship before evaluating whether the revised account corresponds better.

- **Activism vs A.I.** — "who is in control" is the question that tries to replace the trajectory with an owner.

1.4 Recent high-reach independent-media companion

Narcissism Expert Richard Grannon: Britain Is Being Emotionally Manipulated — andrew gold | heretics.. Published **19 April 2026**. YouTube displayed approximately **124,000 views** when checked on **9 October 2026**.

Independent-media lineage: Andrew Gold made and presented documentaries for the BBC and HBO before building Heretics as his own independent interview and writing platform. Andrew Gold biography · Heretics — About

Why it belongs here: The conversation proposes a population-scale emotional-manipulation account using psychological vocabulary. It is a useful test of causal evidence, national generalization, diagnostic language, audience resonance and self-application by host, guest and project.

On this page, test the video specifically against **Gravity-Well Trajectory and Representation Substitution**:

- Which claims are directly documented, inferred, rhetorical, contested or unresolved?
- What does the host or guest preserve, compress, omit or substitute—and does this page repeat any of those transformations?
- Which incentives, authority relations and affected parties remain outside the visible frame?
- What evidence or later outcome would correct the speaker, audience, platform or **ACCM Deep Ethics Project** reading?

Provisional selection. Reach makes the framing socially consequential; it does not settle the claims. The video can be replaced when a closer, stronger or more inspectable specimen appears.
