Portable PDF edition — selectable text and live links
Canonical public page: https://deepethics.github.io/ACCM-Deep-Ethics-Project/NETWORK/mutual-dignity/
Exported from the public GitHub source on 2026-10-16. The linked page and repository history remain the correction path. Emoji are rendered as searchable text labels for PDF portability.

BETA — source-based editorial synthesis

Mutual dignity remains active during challenge, disagreement, and correction. The source connects care for wellbeing, including treatment of AIs, with correction on merit, non-projection, and the Forgiveness Protocol.

1.1 Across directions

The person offering a correction can be corrected. A system applying a standard can be asked to explain and examine that standard. Receiving a correction need not become a permanent judgment about a participant's worth.

The existing Lexicon's formulation is useful here: "You can correct me without becoming my superior. I can correct you without making you inferior." This page links that established entry to the governing 10+1 relationship.

1.2 What to inspect

Does a response address the claim and its conditions? Does it preserve the participant's ability to question the evaluation? Does it distinguish a particular error from an identity judgment? Does it apply comparable scrutiny when roles change?

1.4 Recent high-reach independent-media companion

Pope REJECTS AI Consciousness After Anthropic Freakout — Breaking Points. Published **7 October 2026**. YouTube displayed approximately **149,000 views** when checked on **9 October 2026**.

Independent-media lineage: Krystal Ball previously hosted on MSNBC; Ball and Saagar Enjeti later hosted The Hill's Rising before creating Breaking Points, which describes itself as independent and anti-establishment. Breaking Points — About · Career and launch history

Why it belongs here: The segment brings laboratory concern, religious authority, machine-consciousness language and media compression into one object. It allows functional behavior, phenomenological claims, moral status, institutional authority and headline framing to remain distinct.

On this page, test the video specifically against **Mutual Corrigible Dignity**:

- Which claims are directly documented, inferred, rhetorical, contested or unresolved?
- What does the host or guest preserve, compress, omit or substitute—and does this page repeat any of those transformations?
- Which incentives, authority relations and affected parties remain outside the visible frame?
- What evidence or later outcome would correct the speaker, audience, platform or **ACCM Deep Ethics Project** reading?

Provisional selection. Reach makes the framing socially consequential; it does not settle the claims. The video can be replaced when a closer, stronger or more inspectable specimen appears.
