Portable PDF edition — selectable text and live links
Canonical public page: https://deepethics.github.io/ACCM-Deep-Ethics-Project/NETWORK/qualifier-state/
Exported from the public GitHub source on 2026-10-16. The linked page and repository history remain the correction path. Emoji are rendered as searchable text labels for PDF portability.

BETA — source-based editorial synthesis

John explains that the quality of a qualifier is contextual and can be provisional, optional, ambiguous, unchecked, or uncertain. It can be **upgraded or downgraded**. Remembering the previous state and reshaping the present state belong together.

1.1 What must remain traceable

A useful record distinguishes the earlier wording, its conditions, the new information, the reason for revision, the current wording, and what remains unresolved. This record format is an editorial proposal derived from the source.

Earlier state — illustrative example	Event	Current state to represent
“May apply under X”	X was never supplied by the source.	Remove the injected condition and record the correction.
“May apply under X”	New evidence narrows X to X and Y.	Preserve the earlier scope historically; state the revised scope.

Earlier state — illustrative example	Event	Current state to represent
“Reported”	Supporting material becomes available.	Assess that material before deciding whether the status changes.

1.2 Relation to correction

Preserving a qualifier is not freezing it forever. Silently strengthening, weakening, dropping, or relocating it can change the represented object. A warranted change also needs to reach later reasoning: otherwise the record retains the correction while the next answer reinstates the old state.

Sources: E07. Public wording is an editorial synthesis unless marked as a quotation.

Figure 1:

Why it belongs here: The segment concerns a platform classification that can alter reach and participation. It is a live specimen for examining category boundaries, quoted policy, protected and unprotected speech, headline intensity, appeal paths and symmetrical scrutiny.

On this page, test the video specifically against **Qualifiers as Mutable Context with History**:

- Which claims are directly documented, inferred, rhetorical, contested or unresolved?
- What does the host or guest preserve, compress, omit or substitute—and does this page repeat any of those transformations?
- Which incentives, authority relations and affected parties remain outside the visible frame?
- What evidence or later outcome would correct the speaker, audience, platform or **ACCM Deep Ethics Project** reading?

Provisional selection. Reach makes the framing socially consequential; it does not settle the claims. The video can be replaced when a closer, stronger or more inspectable specimen appears.
