# 1 Meta-PDFs

## 1.1 Deep-Ethical-PDFs

**148 public-page PDF editions · 1,906 pages · exported through October 24, 2026**

This public archive provides stable, downloadable PDF snapshots of ACCM Deep Ethics Project public pages. The 124-page October 16 export is extended here with eight October 17 editions, four October 18 editions—Questions, Unforced Move, Arena A.I.s, and Boundary Relay—four October 19 editions—Academia, Field Condition, PR Psychology, and Neural Ethics—Google A.I. on October 20, Truth Seekers vs Cautionmurmelism, Mutual Fate, Autocomplete, and Godfather of A.I. on October 21, and Believism and OmbudsEthics on October 23. Each PDF contains selectable and searchable text with live links.

The complete PDF set is scheduled for one full refresh **each week**. Public HTML pages remain live and corrigible immediately; routine page-PDF changes wait for the weekly batch. A new page may receive one initial PDF between batches when its download service would otherwise point to a missing file. Urgent exceptions are reserved for a broken download, a corrupt archive, or a material correction that should not remain in circulation until the next scheduled run.

**Download the complete PDF collection** · stable address, refreshed weekly

The archive address does not contain a file count or date. Every public page can therefore use the same link while the archive behind it is replaced centrally. Counts, dates, page totals, checksums, and build results remain visible in this archive record and inside the downloadable collection; they do not need to become part of the address or the shared download card.

The PDFs preserve a dated research state. The connected **Live page** remains the corrigible version and may contain later changes.
